Solenoid Valve Enclosure with Timer

Compact Size, NEMA 4X Enclosure

CE

The Series SVT Solenoid Valve Enclosure with Timer is a compact, reliable and economic package designed for small to medium filtration systems. It combines a timer board and solenoid valve enclosure into one package, eliminating the need for separate enclosures and wiring. The SVT is available with 2, 4 or 6 valves. For larger systems expansion modules can be daisy chained to the SVT for a max of 60 outputs. The SVT is available in either 90 to 240 VAC or 240 VDC/VAC supply voltages allowing it to be used in low or high voltage applications. On-demand cleaning or down time cleaning functions can be selected with a simple dip-switch. Time-on and time-off settings are selected using two potentiometers.
